

On the following pages you will find a chart for each specific room with the particular components for that room. We have also included pertinent questions for you to ask, which will provide you invaluable information about your home and help you determine whether or not corrective action is necessary on that particular item. If so, the item should be noted on your chart in that particular box (see sample chart below) All items noted require immediate correction prior to you taking possession or closing on your new home.

 Check the box for any items needing corrective action.

After the orientation or initial walk through of your home, review the list with the builder representative/seller so that he/she will be able to write down the items that need correction or replacement prior to taking ownership of the home. Always keep a copy of your findings on the house as well as a copy of the builders/seller corrections made and documented. This will ensure that there won't be any discrepancies upon the delivery of your home or the corrections that are needed.
